

Technology: **Lithium Battery System**

Location: **Worcestershire**

Client Brief:

Client had an existing large Solar PV installation and wanted a storage solution, along with backup power for when the grid failed in the area.

Scheme Design:

1 x 10kW Hybrid Lithium-Ion Storage system incorporating

- 4 x 2.5kW Lithium Ion Batteries.
- 2 x SolaX Hybrid Solar Inverters / Chargers
- EPS (Emergency Power Supply for the event of Grid Failure)
- WiFi System Monitoring

Financial Benefits:

Client reports that whilst he is making savings on his electricity bill, his main objective was to protect the farm from the poor grid supply in the area.

Client Comments:

"I am delighted with the system and cannot recommend Rural and Country highly enough. The installation staff were fantastic and even installed the system at high-level so we could continue to use the barn for storage and cattle".
